CentOS

Alternate Images SIG

Let's Talk About It

TROY DAWSON
Alternative Images SIG Chair
tdawson@redhat.com

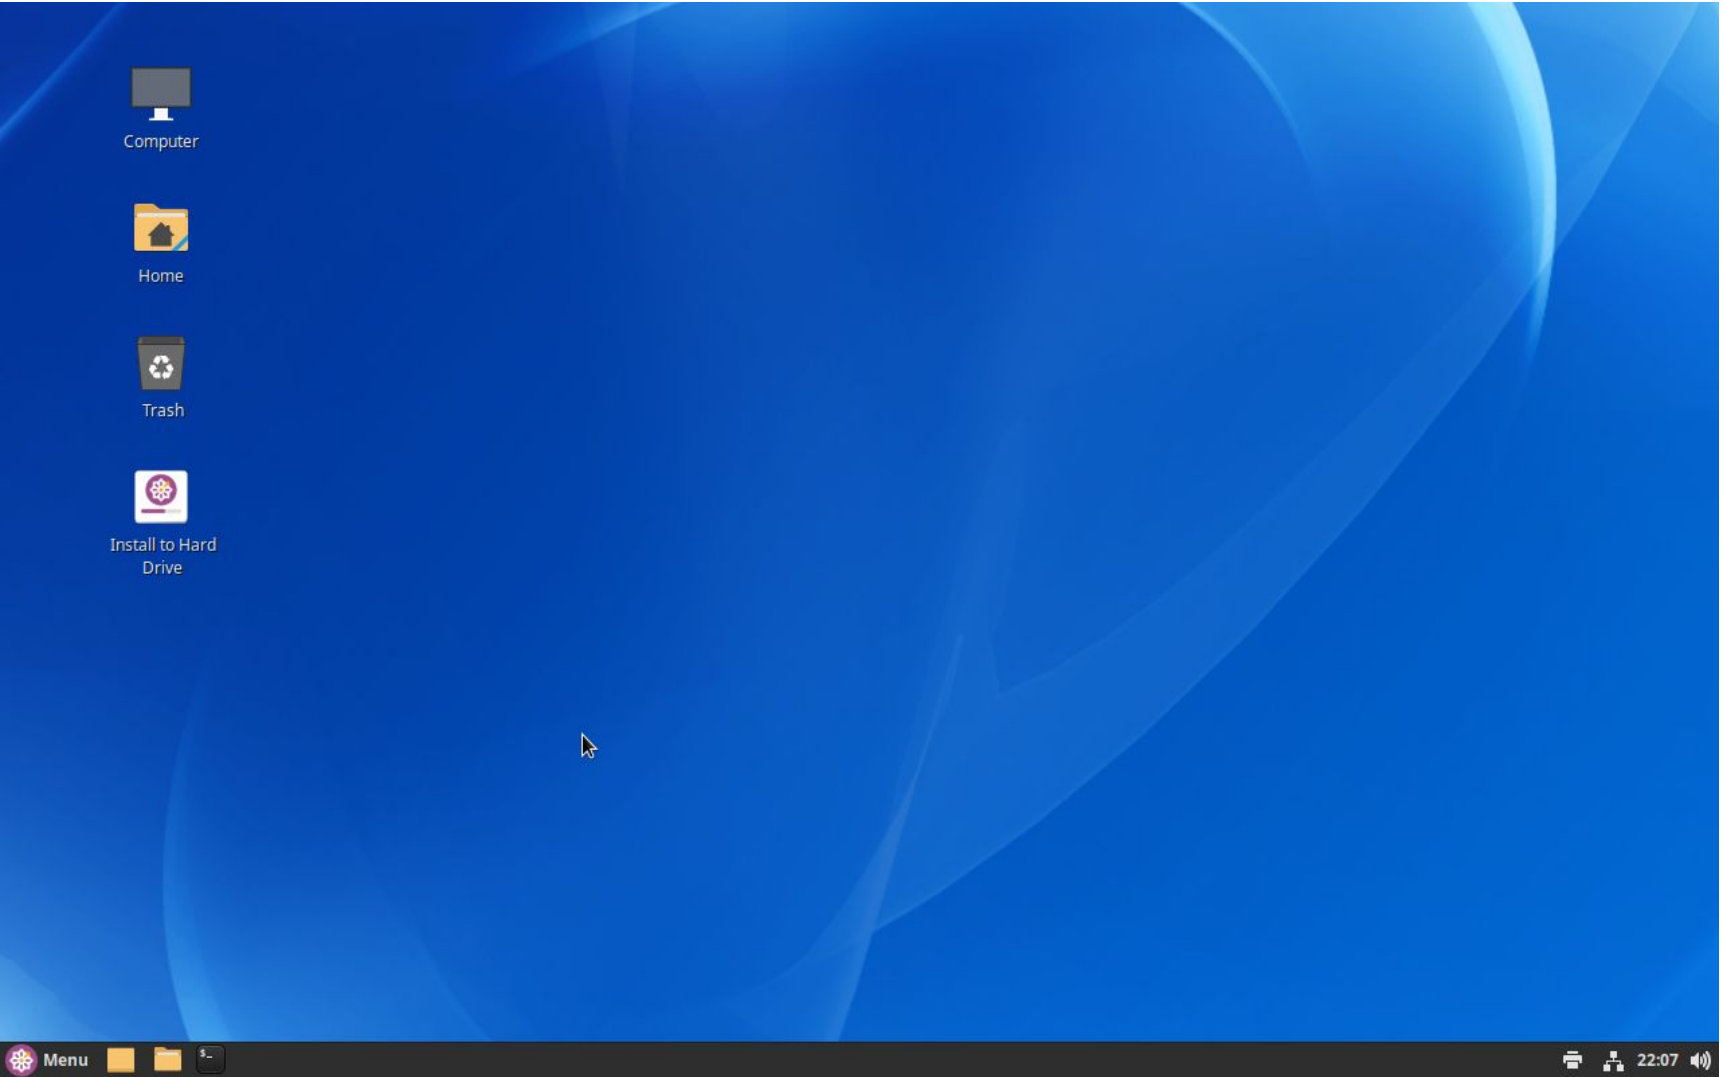
OVERALL GOALS

The Alternate Images SIG's goal is to build and provide alternate images for CentOS Stream.

Whenever possible, these images will be created on the CentOS SIG infrastructure.

Progress

- We are on our third quarterly update
- We now have 6 Live Images you can boot up and install from.
  - Cinnamon
  - GNOME
  - KDE
  - Mate
  - XFCE
  - MAX
  - Min



Cinnamon Live

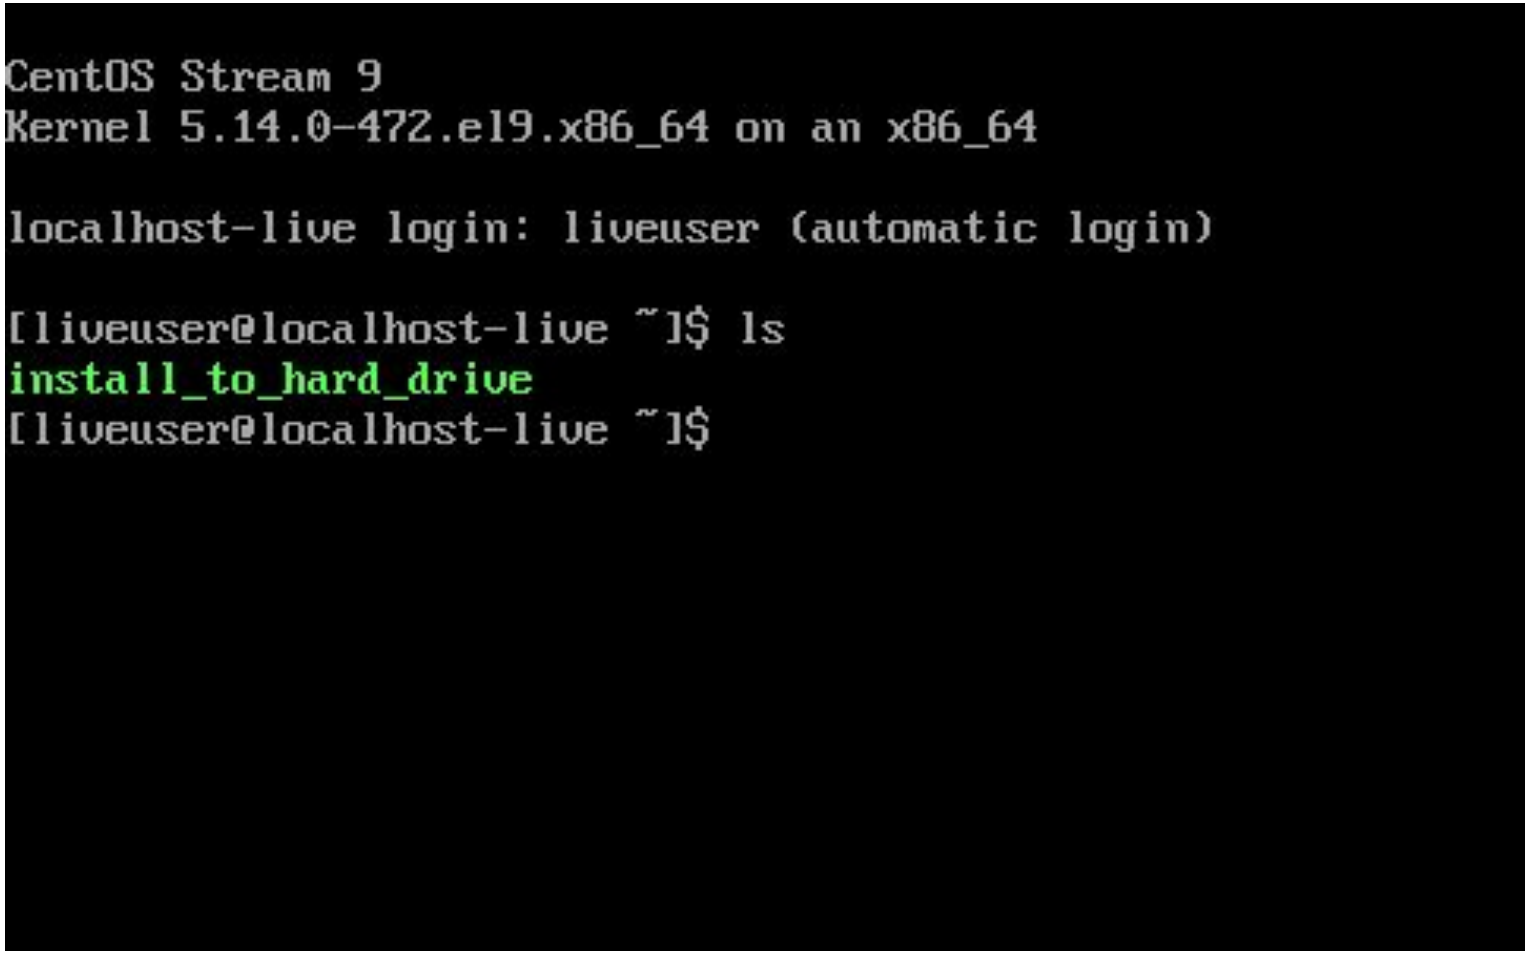
MAX
Live



CentOS Stream 9
Kernel 5.14.0-472.el9.x86_64 on an x86_64
localhost-live login: liveuser (automatic login)
[liveuser@localhost-live ~]$ ls
install_to_hard_drive
[liveuser@localhost-live ~]$

MIN
Live

Future

- Persistent Media
  - This will allow users to customize their Live media
- Raw Images for Aarch64
  - First get raw images working
  - Ultimate goal is get them working on RPi if possible

Meetings

The SIG holds regular meetings on the 2nd Thursday of each month at 19:00 UTC at https://chat.fedoraproject.org/#/room/#meeting:fedoraproject.org

Meetings are logged and the minutes for past meetings are available.

Mailing List and Communication

The SIG uses the centos-devel mailing list for coordination and the #centos-alt-images Matrix channel for interactive communication.
